

Delivering solutions that seamlessly transition from concept to results

Congruex is a multi-national organization that specializes in broadband network construction and engineering. We support some of the largest service providers in the United States with a footprint that extends across the nation.

Our turn-key design and build solutions allow our customers to deliver more data, more bandwidth, and ultimately support more devices for their end users.

Our diverse self-perform capabilities allow us to deliver high quality telecommunications and utility solutions with efficiency as one combined end-to-end business.

Engineering Services

- Structural design and analysis
- Expertise from telco to civil
- Creative and practical solutions that fit client requirements

Construction Services

- Delivering in challenging environments
- Teams with a focus on quality
- Construction management capabilities lets clients keep valuable resources on the most revenue-generating projects

Specialty Services

- FTTX deployments are fundamental service
- Road moves utilizing patented technology and process
- LiDAR and drones for data collection
- Distributed Antenna Systems (DAS) for wireless
- Supervisory Control and Data Acquisition (SCADA)
